Washington 25, D. C.

Attention: Dr. Ralph T. Stewart, Director

Dear Dr. Stewart:

I have had a request from Professor Chumakov of Moscow for some B virus antiserum and a specimen of the standard B virus to permit them to identify certain viruses that they have recovered from monkeys in the course of preparation of Salk type vaccine. This is a standard procedure in the safety testing of such vaccine and I would greatly appreciate it if I could have a license to send them these specimens by air mail.

Sincerely yours,

Albert B. Sabin, M. D.
