Dear Albert,

I found your wire, forwarded from Jacksonville, waiting for me on my arrival—here, here—today. I hope (God willing) that I can spend a 2 or 3 weeks of vacationing.

Think the suggestion of Dawson is excellent, and I am sorry to lose the liberty of asking you to sound him out, either directly, or through Dr. Good's parlor, as you see fit. Dr. Good's parlor, as you may know, is a member of Dr. Black's Board, and we should attend its Washington meeting. If Dawson is willing (and anxious) to join us, we will hear and I shall testify. Black and his man will be presented at the Washington meeting, for free approval, which is a formality—in my disqualification case (I think) when he comes out is just an American citizen, when she is on the staff of a drug firm, and she
le is in the Navy, a U.S. Pub Health Service. The name I think about always is
the one I think he would prove to
be a valuable member of this commis-
mission - as go as far as for him
an idea.

In several ways I should like to
consider Bodkin also. - The main reason
is: - How is it to be a member (?
possibly to direct?) the Departmental views
commission for the Navy. He was given
his assignment prior to the formation
of our a commission, then turned down
because of physical disability - but was
not considered later. - By having Bodkin with
us, we could establish liaison with the Navy.

With Army-Navy 2 representatives in the
same lot. This may or may not prove
to be good men. But according to Col.
Sinnors (also the real sponsor of this
Army commission) it is the sort of
thing that the Army wants, particularly
with difficult problems like enopha-
logistis and polo, where there is limited
talent available, and where a pooling of
resources may have its advantages.

Yet away, on its thin branch fell
out that I need a pathologist, and a better family - but my suggestion (which I would like you to examine and deal with as you think fit) is.

I would like you to be the Senior Neuropathologist for Dawson, perhaps Bodian if representing the junior neuropathologist. Then I am an amyloid or a core. I probably can show my selection in two words - it is "an ice" - the proper way to handle it. Should notify you and you can decide what you would do. In any case, whether you would like to do it or an amyloid yourself - or deal with Dawson, or Bodian - I could not say. You need a neuropathologist as placed elsewhere (from a geographical standpoint) but at least they would fit in all right and together.

You will have to let me know some of you decisions about him before this Washington meeting.

As ever,

John R. Paul
