MEMO NO: Members and Associate Members, Commission on Viral Infections, APHIS

FROM: W. McD. Hammon, M.D., Director

DATE: 23 April 1959

SUBJECT: Reconstitution of Hepatitis Subgroup

It has appeared wise to realign the somewhat informal "Hepatitis Subgroup" within the V. I. Commission. This group has represented those individuals who were working most actively on problems related directly to hepatitis and with whom the Commission has found it advisable to call special meetings from time to time in order to exchange or compare information. Since the fields of primary research application or interest have changed for certain individuals from time to time and since economy dictates limitations on attendance of special meetings, the following persons are being appointed to the Hepatitis Subgroup for the next two years (1 May, 1959 to 30 April, 1961):

Dr. Bang
Dr. McGillem
Dr. Havens
Dr. Hirsh
Dr. Heile
Dr. Paul (Chairman)
Dr. Krugman
Dr. Ward

If at any time other members of the Commission find they can turn their research activities more directly to the hepatitis field or others new so engaged change their interest to other fields, a readjustment of membership can be made.

W. McD. Hammon, M.D.
Director
Commission on Viral Infections
