Dr. John R. Paul  
Yale University School of Medicine  
333 Cedar Street  
New Haven 11, Connecticut

Dear Doctor Paul:

May I express our appreciation of the job done by you and Dr. Albert Sabin in reviewing the two papers by Major Burns entitled "Antibody Response in Military Personnel Following Japanese B Encephalitis Vaccination with Lyophilized Chick Embryo Type Vaccine" and "Antibody Response in Japanese Children Following Japanese B Encephalitis Vaccination with Lyophilized Chick Embryo Type Vaccine."

Your and Dr. Sabin's suggestions fit very closely with those that had been brought out by the Army Medical Center, and I shall recommend that the papers not be published in their present form.

Sincerely yours,

FRANK L. BAUER  
Lt. Col., Medical Corps  
Administrator, Armed Forces  
Epidemiological Board
