APO 500 US ARMY  

7 July 1950

Dr. A. E. Sabin  
The Children's Hospital Research Foundation  
Elland and Bethesda Avenues  
Cincinnati 29, Ohio

Dear Dr. Sabin:

Inclosed you will find a roughly drafted manuscript, entitled "Japanese B Encephalitis among Vaccinated American Military Personnel, 1949", which after due consideration and polishing will be submitted for publication. I am sure you will find this rather timely in that one of the cases reported on (V9-4902) was referred to in a letter by Dr. Paul (at your suggestion), dated 20 June 1950, as Case No. 10. The clinical history and course of this patient was indicative of poliomyelitis, while autopsy findings were consistent with that of Japanese B encephalitis. Incidentally, I have compiled a complete laboratory report on this case which is being forwarded to Dr. Paul, then to you, by Col. Hullinghorst.

This material is sent to you purely as a matter of personal discussion and interest and it is requested that no official reference be made to this manuscript. A discussion and marked suggestions for style of medical typography will be appreciated.

With kindest personal regards, I remain

Sincerely,

KENNETH F. BURNS
Major, VC
Department Chief
