MEMORANDUM FOR: MEDICAL INTELLIGENCE, OTSG

SUBJECT: Russian monograph dealing with studies on Asian Influenza, Translation of.

1. Several members of the Armed Forces Epidemiological Board have received copies of the attached monograph on Asian influenza. Before deciding whether or not this material is worth the effort of translating in its entirety they would like to have a translation made of the chapter headings and chapter summaries, if the latter are available in the text.

2. If chapter summaries are not available in the text itself would it be possible to have a summary of the contents of each chapter as these appear to the translator. Any other opinion that would help in deciding whether or not the entire text is worth translating would be appreciated.

3. Return of the enclosed monograph is requested.

Encl = Russian monograph
