March 17, 1949

Dr. Albert B. Sabin  
The Children's Hospital  
Research Foundation  
Cincinnati 29, Ohio

Dear Albert:

Thank you for the copy of the letter addressed to Doctor Rottino, which you were kind enough to send me. We all, of course, are interested in studying the effect of dengue virus on many of the lymphomas which are refractory to the ordinary measures. However the cases have to be selected, and be approved by several groups in our hospital. As soon as I obtain the green sign to go ahead I will communicate with you and then discuss the problem with Dr. Erf and Dr. Rottino.

We have facilities for either keeping the material in a deep freeze or obtaining dry ice for the same purpose; so that it should not be necessary for you to lyophilize it for us.

With kindest personal regards,

Sincerely yours,

Peter Vogel, M.D.
