Dr. Albert B. Sabin
The Children's Hospital Research Foundation
Elland and Bethesda Avenues
Cincinnati, Ohio

Dear Doctor Sabin:

I have submitted the manuscript on dengue for publication in the American Journal of Tropical Medicine and Hygiene and I am enclosing a copy of the final draft for your use in making the copies you need.

In regard to our conversation in Louisville concerning the possibility of doing work on dengue in Panama, I have discussed the subject with my chief, Dr. W. H. Wright, who has agreed to support my assignment to the Gorgas Memorial Laboratory if the necessary funds can be obtained and, if, as now seems very likely, my planned assignment to the Belgian Congo is postponed. In connection with the latter point, a definite decision will be made in approximately one week. As you may know, Dr. Clark of the Gorgas Memorial Laboratory has agreed to make space available for the work.

Although it is possible that funds from this Institute will be available for my travel expenses, such an arrangement is uncertain at this time. Have you had any further thoughts on the subject and/or offers of financial support?

Sincerely yours,

Leon Rosen, M.D., Dr.P.H.
Laboratory of Tropical Diseases
National Microbiological Institute
