Dr. A. B. Sabin
The Children's Hospital Research Foundation
Elland and Bethesda Avenues
Cincinnati 29, Ohio

Dear Dr. Sabin:

I am enclosing the results of neutralization tests from Sapporo, two from Okinawa; and the summaries of the early Tokyo groups and a letter of Dr. Matumoto's, which is self-explanatory.

Although the tests on the Okinawa sera are not finished, the mice are showing a high percentage of survivals. Protection may not be as high as for Kunsan but nearly so.

It is going to be necessary to repeat two or three of the Sapporo tests because of high and low control titres, so reports on those will be delayed about two weeks.

With best wishes.

Sincerely yours,

RAY E. DEUEL
Captain MC
