Dr. Albert B. Sabin  
The Children's Hospital Research Foundation  
Elland and Bethesda Aves.  
Cincinnati 29, Ohio. 

Dear Dr. Sabin,

I am sorry indeed that I forgot to write a letter to you. I received a couple weeks ago several copies of manuscripts for publication:

2. Sabin, A. B. Antibody response of people of different ages to two doses of uncentrifuged, Japanese B encephalitis vaccine.

I appreciate very much your kindness sending these things. I should like to speak on these studies of last summer at the monthly meeting of the institute.
We are waiting for Dr. Hammon’s arrival in Tokyo which is expected in July. Then we will be busy again as we were last summer.

Yours Sincerely,

Minoru Matumoto

Minoru Matumoto

Dr. Sabin —

Within ten days results of all vaccination series, U.S. Army, Japanese children against Typhus Epidemic will have been completed. Accumulative report will be forwarded to you at that time.

Yours regards.

Kenneth F. Burns
