10 March, 1948

Dr. Minoru Matumoto
C/O Lt. Col. W. D. Tigertt
HQ 406th Medical General Laboratory
APO 500 C/O Postmaster
San Francisco, California

Dear Dr. Matumoto:

I regret very much to have delayed so long in replying to your letter of 31 January, 1948, and I also regret that because I have been extremely busy with many other things, I have been unable to prepare for publication the data on the distribution of neutralizing antibodies in human beings and domestic animals in Japan, Korea and Okinawa, on which you had worked together with Captain Neuer and Captain Deuel. I will send you a copy of the final draft at the same time that it is submitted for publication, but it may be a little while before I shall be able to get to it.

I was delighted to hear that you had been appointed assistant professor at the Tokyo University and as a member of the Institute for Infectious Diseases.

With all good wishes and kindest personal regards,

Sincerely yours,

Albert B. Sabin, M.D.

ABS:mje

P. S. The following papers have appeared in the American Journal of Hygiene in November, 1947, but the reprints have only just been received:

Under separate cover I am sending to Col. Tigertt to be transmitted to you 50 reprints of each of these articles.
