Jan 8, 1940

Dear Albert:

It was shocking to hear the tragic news of Forbeck. I suppose there is also the problem of the adopted son who turned out to have congenital athetosis (?) or some such horrible malady. Mrs. Forbeck surely deserves something better out of life. I hope she is bearing up under this assault.

When you told me the story of Paul and what I related to him I felt sure the National Foundation would fork out. I am delighted with the grant given you. I might say that monkeys are available in Ny. (Conrad’s statement). There are 2
Kinds: "Crate" monkeys, not quarantined at 5 per. and regulars at 10. The former are not desirable (Conrad) and Ifflelich has an ample supply of them.

Will you please send the last pages of the International Bulletin to complete your Vol. 1, Collected Reprints. On whose advice Mrs. Stein (who sends her cordial regards) to write or phone to Collze again?

Last spring I spoke with Dr. Avis and Dr. Mitchell about the Am. Pediatric Soc. (Read Johnson?) Award of $100 usually offered at the spring meeting. I believe I stated to the latter when he was here that after the turn of the year Broane would recall his attention to this. Shall I
go ahead and write Mitchell (or who
is the person?) Of course it is more
unusual to do this with the
Victim's knowledge, But with
political hands stretched out, I do
not wish to do the wrong thing—as
you can realize.

Many thanks for keeping me
informed about the unfortunate
Forrecher. Can you locate Mrs. Forrecher's
address?

With affectionate regards to your
sister and Francis (myself)

Tyler says the sections are coming
along and you may leave them
room, he has written you about 2 days
ago.
