Albert B. Sabin, M.D.
The Children's Hospital Research Foundation
University of Cincinnati
College of Medicine
Cincinnati, Ohio

Dear Dr. Sabin:

We are undertaking exploratory studies on the antigenicity of various strains of polio virus. We would like to include the three types of tissue culture attenuated viruses which you described in the Journal of Experimental Medicine 99, 551 (1954). If you are now sending out these viruses, we would very much appreciate receiving samples of them.

Sincerely,

THE UPJOHN COMPANY

Gerald E. Underwood, Ph.D.
