Doctor Albert B. Sabin  
CINCINNATI (Ohio) (EE.UU.)

Dear Dr. Sabin:

My most sincere thanks for your letter of May 3, which I have received together with your corrections of the English transcript of your lecture, and for your authorization for publication in the "Revista Ibys" of this lecture in Spanish.

I am sorry that my letter of April 19 to let you know of the supply of vaccine to the "Dirección General de Sanidad", for the campaign in the two provinces in the north of Spain, was not sufficiently clear. The first 195,000 doses from "Gayoso" and those from "Ibys" were imported already bottled from England, and therefore our rôle has been limited to labeling and boxing of the bottles, which were maintained at correct temperatures until handed over to the Dirección General de Sanidad.

I hope within a few days to be able to write to you in greater detail.

With renewed thanks for your attention to our problems and requests.

Sincerely,

Firmado: Gonzalo Urgoiti

my best regards.
