Dear Dr. Sabin:

The technical requirements which you indicated to us as being indispensable if we were to carry out dilution and bottling of Sabin type anti-polio virus vaccine in our laboratories having been complied with, it is our pleasure to confirm by means of the present letter our adherence to the conditions contained and detailed in your letter of Oct. 5, 1962.

These conditions, which are given in full detail in the letter mentioned, bear on:

1) Our obligation to specify on the product labels the place of manufacture of the vaccine, by means of the text approved in your last letter of July 21, reading: "Manufactured in Beckenham, England, under license from Dr. Sabin".

2) Technical guarantees in connection with the personnel and work areas assigned to dilution and bottling of the vaccine - special work procedures.

3) Remittance to the "Dirección General de Sanidad" of the necessary containers from the different production batches, for proper official control, previously determined.

Yours faithfully

Signed
Gonzalo Urgoiti
