Dear Dr. Sabin,

The polio article finally got off to the printer today, and I want to thank you for the great amount of help you gave on it. I used many of the detailed corrections you wrote in on the manuscript, and the larger issues you raised were in my mind constantly as I made my general revisions. Where there were differences of opinion, and when they could not be reconciled by qualifying phrases, we asked Dr. Rivers to serve as impartial arbiter. The net result is somewhat more positive and optimistic than you might want to endorse, but represents a considerable modification of the working draft.

I am returning your photographs under separate cover. It was finally decided to use drawings for most of the il-
Illustration, so the pictures were not used.

Good luck in your current work.

Sincerely,

Robert Coughlan
