Dr. Albert B. Sabin
The Children's Hospital Research Foundation
Cincinnati, Ohio

Dear Dr. Sabin:

Before I approach the Directory for Mothers' Milk regarding the possibility of supplying milk for investigative purposes, I would like to know in a general way how much or how little you would require. If we are talking in terms of a few hundred cc., that would presumably not be very difficult. On the other hand, if you need several liters or none at all, my approach would be different and my chances of success a little dubious.

Yours very truly,

Clement A. Smith, M. D.
