Dear Dr. Sabin:

Thank you so much for your letter and for your interest to carry out the certain tests for antipolio substance with milk from goats.

I feel highly honored to be able to help and if you need more milk to carry out your tests, let me know. I'll be very glad to send it immediately, anytime, by Air Express.

Hope the milk reached the hospital safely and you found everything in good shape.

My veterinarian and drugest told me what to do, as this was my first experience in preparing milk for experimental purposes. I took all precautions toward sterilization etc.

Good Luck with your experiments and thank you again for your interest to work with goat milk.

Yours truly,

Miss Alice Dlask
