Dr. Albert B. Sabin  
Children's Hospital Research Foundation  
Cincinnati, Ohio

Dear Sabin:

Thanks for your letter of October 25th. Since the reception and dinner for the National Foundation grantees brings together most of the men in the poliomyelitis group, it certainly would be a good time for a meeting. Such a meeting certainly would not interfere with any of their plans, for the non-grantees would not have to be asked to the dinner. I am glad you are taking the matter up with Gudakunst.

The discussion outlined in your letter would be a very timely one, and I should like to see added:

D. (1) Distribution of the disease in the light of A, B and C.  
(2) Dissemination of the virus in the light of A, B, C and D1.

Under (1) I should like to hear a discussion of the distribution of clinical poliomyelitis, and under (2) a discussion of "total poliomyelitis" (this term is so well understood—it is beginning to be so general—that we might as well use it here), that is, clinical poliomyelitis plus subclinical poliomyelitis, in the light of A, B, C and D1.

With best wishes, I am,

Sincerely yours,

W. Lloyd Aycock
