

Dear Dr. Saher -

Dec. 5, 1989

Thank you for all have done and accomplished in helping to control and almost eradicate the terrible disease - polio.

Life does not always give just rewards - but you must know and derive extreme satisfaction that millions of youngsters as well as adults are reaping the fruits of your labor.

Fortunately our family has been spared Polio - so far. I thank God for that. But we have other problems - cancer namely.

Should that the Good Lord could give you another time - another strength to do even more. But for now we ask that you at least enjoy a modicum of peace and sense of fulfillment. Hopefully - someone else can do something to help you in your trials.

Good luck - God bless you - and again a million thanks

Gratefully,
Clare Kaiser
