January 16, 1954

Dr. George X. Schwemlein
Editor, Cincinnati Journal of Medicine
Academy of Medicine of Cincinnati
371 Doctors Building
Cincinnati 2, Ohio

Dear Dr. Schwemlein:

Enclosed you find a brief manuscript about which I talked to you over the telephone. If you find that the time is too short to get it into the issue which will appear early in February and that you would, nevertheless, wish to put it into the subsequent issue, it may be possible to add an appendix giving the gist of the report of the National Advisory Committee on the Evaluation of the Use of Gamma Globulin in Poliomyelitis in 1953. I am a member of this Committee and we shall meet in Atlanta, January 27-29. It is quite possible that an official report will be made public very shortly after that meeting.

Sincerely yours,

Albert B. Sabin, M.D.

ABS/jcs

Encl: manuscript.
