Dr. Albert B. Sabin
The Children's Hospital Research Foundation
Cincinnati 29, Ohio

Dear Albert:

I much appreciate your considered letter of December 15th in which you comment on Dr. Kempe's letter concerning the problem of the polio vaccine. As it has turned out, I believe the circularization of the Kempe letter will prove to have been very useful. The basic problem here has been one of many newspaper reports and very little scientific literature giving answers to fundamental questions. The National Foundation had a special meeting in Pittsburgh on December 21st and within a week or ten days I am to receive an official statement from Dr. Rivers which can be circulated to the membership of the Academy. I believe this will serve to clarify the whole situation.

With best wishes.

Yours sincerely,

Aims C. McGuinness, M. D.
