April 26, 1985

Dear [Name]:

On the basis of what you wrote me about your wife's condition, I would have to say that the diagnosis of "post polio paralysis" is not at all clear. If continual pain is the main problem it is not a part of the post polio condition, but rather more likely caused by her arthritis.

I regret very much that this is all I can say.

Best wishes,

Sincerely yours,

Albert B. Sabin, M.D.
