February 26, 1952

TO: Those attending the Meeting on Poliomyelitis March 14, 1952, Peter House, National Institutes of Health.

FROM: Dr. Norman Topping

There is attached for your information a selected bibliography concerning some of the material that has been published on the possible relationships between injections of various antigenic materials and poliomyelitis.

It was thought that possibly you would like to review some of these articles before the meeting on March 14.

Enclosure.

Bousefield, G. Paralysis following immunizing injections; measures calculated to diminish the risk. Lancet, 1:1028-1032, May 12, 1951.
