Dear Doctor Sabin:

I was out of town when your letter arrived and this is my first opportunity to answer it. I have indeed noted the interchange between Figures 8 and 11 in the article. This disturbed me greatly and I have written the editor concerning this. I was also disappointed that due to the necessity for "shortening the paper" several paragraphs had to be deleted and also the statement of acknowledgement for all the assistance that you had given us in planning and evaluating the study. We are in the process of completing serological testing and have completed the stool cultures on those who showed no antibody responses. These did not reveal the presence of other viruses.

All is going well here. Doctor Christie is on sabbatical leave and is half-way 'round the world. In our last letter he was having a little trouble with gastroenteritis and had had an anterior dislocation of the shoulder during a fishing trip. In spite of all this, his spirits seem to be good, as usual.

Glad you had the opportunity to talk with Blair. He was here a couple of weeks ago and gave an address during our alumni reunion.

Kindest personal regards.

Sincerely yours,

Randy Batson, M.D.

P. S. I was informed by my secretary that she had already sent reprints to you.
