Dr. Albert B. Sabin
Children's Hospital Research Foundation
Cincinnati, Ohio

Dear Doctor Sabin:

Thank you very much for the copy of your paper entitled "The Natural History of Human Poliomyelitis II. Elimination of the Virus", which has been submitted to the Journal of Experimental Medicine. When and if this article is accepted for publication will you please order for the Foundation five hundred (500) reprints, 7 x 11 inches if convenient, without covers, to be billed and delivered to this office.

Since the purpose of the grant under which you are working is "to study (A) Distribution of poliomyelitis virus in cynomolgus monkeys succumbing to infection by the oral route and (B) the nature of human poliomyelitis: distribution of the virus in different levels of the alimentary tract", it would appear proper to use time, materials, and animals in the study of a human case of poliomyelitis apparently developed under working conditions incident to the primary investigation.

In this connection I would like to point out that the grant under which you are now working was made on May 20, 1941, and terminates on December 31, 1941. I would judge that under these circumstances there should be enough money to care for any extra expense incurred in this special study.

Yours very truly,

Don W. Gudakunst, M.D.
Medical Director
