April 28, 1950

Dr. Albert B. Sabin  
The Children's Hospital Research Foundation  
Cincinnati, Ohio

Dear Dr. Sabin:

Today we received a copy of the April 1950 issue of "Braces Today." In this issue there was an article about the American Academy of Orthopaedic Surgeons' February meeting. We notice that you talked on the role of toxoplasmosis. When copies of your talk will become available, will you please send us a copy. We have a demonstration cerebral palsy treatment center in Hawaii and would be most interested to know your thinking on the role of toxoplasmosis.

Arrangements are all in order for the toxoplasmosis specimen collections and we will keep you posted. We are also enjoying your symposium on toxoplasmosis.

With kindest regards,

Sincerely yours,

[Signature]
