July 18, 1942.

Dr. Albert B. Sabin
University of Cincinnati
College of Medicine
Cincinnati, Ohio

Dear Dr. Sabin:

I would appreciate very much a reprint of your article in the March 1st, 1941 number of the J.A.M.A. I would also appreciate, for demonstration purposes, any material you might have available, that is, one or two slides of the brain lesion and smears and a print of the same from which I might make lantern slides for teaching purposes. Your figures 3, 5 and figure 6 a and b seem to me especially valuable from a teaching standpoint.

Sincerely,

GEORGE R. CALLENDER,
Colonel, Medical Corps,
Director.
