Major Albert B. Sabin  
Medical Field Service Training School  
Carlisle Barracks, Pennsylvania

Dear Albert:

Many thanks for your letter of February 19th.  
I am grateful to you for all the trouble that the  
neutralization tests, etc., have caused you.  I am  
sorry, of course, that they were negative.  Under  
the circumstances it does not seem that this case  
is worth reporting.  I should, however, appreciate  
your opinion about the value of a report which would  
consist of a case history of an individual who now  
apparently is well and whose only definite finding  
was the presence of the bodies in the muscle tissue  
that you observed.

I assume from your letter that you will  
be on special service with the Army.  I can well  
appreciate why you would be most anxious to do this,  
but I do hope that the organization and work that  
you have so effectively carried out at Cincinnati  
will continue in your absence.

With kindest regards,

Sincerely yours,

Jerome T. Syverton, M.D.

JTS: c

P.S. Upon rereading this letter I remembered that you  
will be in Cincinnati until the 26th so I will  
send it to you there.
