Dr. Albert B. Sabin  
Children's Hospital  
Cincinnati, Ohio

Dear Dr. Sabin:

It was indiscreetly generous of you to talk so long with me despite laryngitis and a major paper coming up; I'm grateful indeed, and trust you have fully recovered.

Here is the first draft of Mrs. Brecher's and my article on toxoplasmosis. If we have understated your own role, it is partly for lack of space. The article is too long already, alas, so that any additions must be balanced by cutting something else.

We know you'll find errors of fact or interpretation or both, and we'll very much appreciate your frankest comments or suggestions. If you'd rather comment by phone, charges collect, our number is LEonia 4-5731.

Copies are also going to Drs. Ryan, Jacobs, Eyles, Wolf, and Eichenwald.

Sincerely yours,

Edward M. Brecher

Replied by hand - deplored unwarranted excessive optimism re: Daraprim & Sulfadiazine in Choreaumatic
