211 East Chicago Avenue,
CHICAGO...60611 U.S.A.

Dear Dr. Sabin,

Within the next few weeks the water supply of Sydney and Wollongong will be fluoridated – affecting approximately 25% of the Australian population.

The Dental Health Foundation and the Australian Dental Association have been actively concerned in the promotion of fluoridation in Australia and we are extremely pleased with this great step forward.

As America leads the world in dental health education, particularly in fluoridation of community water supplies, and because of Australia's close ties with your country, we are taking the liberty of writing to ask you for a statement of congratulation.

Your support of dental health education and fluoridation is well known in this country and we would very much appreciate having your statement so that we can release it, together with statements from leaders throughout the world, on "Fluoridation Day".

Your kind attention to our request would be very much appreciated.

With compliments.

Yours sincerely,

Peter F. Lazar
Director
