November 13, 1964.

Dr. Albert Sabin,
c/o The Children's Hospital Research Foundation,
Elland Avenue and Bethesda,
Cincinnati, Ohio.

Dear Albert,

I see by a clipping from this morning's Gazette which I enclose herewith that you are the recipient of an Italian award and I send you this expression of my warm congratulations.

May you continue to go from strength to strength.

With kindest regards,

Very sincerely,

[Signature]
In Rome, Dr. Albert Bruce Sabin of the United States, discoverer of the anti-polio vaccine that bears his name, has been awarded the 1964 prize for applied medical sciences. David Elliott, of Cedar Avenue, Montreal, at present working in the department of geology, Imperial College of Science in London, England, has been awarded a doctoral degree from the University of Glasgow. Dr. Elliott received his earlier education at Lower Canada College. Flying Officer J. C. Brace of Harvard Avenue, Montreal, has received his wings at RCAF Station, Moose Jaw, Sask. F. O. Brace will be proceeding to RCAF Station, Portage-la-Prairie.
