July 31, 1962

Dr. Albert B. Sabin
The Children's Hospital Research Foundation
Elland Avenue and Bethesda
Cincinnati 29, Ohio

Dear Albert:

The type 12 material that Wally sent you was the same virus suspension that he used to initiate tumors in hamsters.

Karl Johnson plans to arrive in Cincinnati at approximately 4:00 p.m., August II. He plans to leave Cincinnati Sunday evening. I appreciate your courtesy in giving him your valuable time.

Looking forward to seeing you in Montreal; best regards to the family.

Sincerely,

Robert M. Chanock, M.D.
Laboratory of Infectious Diseases
National Institute of Allergy and Infectious Diseases
