Dr. A. B. Sabin  
The Children's Hospital Research Foundation  
Cincinnati, Ohio

Dear Albert:

It would seem that I never get around to writing you except when I request a favor. I'm sorry but will try to do better in the future. I am planning some studies in which I will need West Nile and Russian Spring-Summer. If you have these two viruses I would appreciate it if you would send them to me.

I may be in Cincinnati in August and if you are in town will probably see you then.

Best regards to you and the family.

Sincerely yours,

Carl E. Duffy, Ph. D.  
Professor of Bacteriology and Parasitology
