Dr. Anthony J. Girardi
Microbiological Research Foundation
4846 Bethesda Avenue
Bethesda 14, Maryland

Dear Dr. Girardi:

Thank you very much for your letter of July 3rd. I would appreciate it very much if you could let me know the titers of the culture fluids in human heart cells of the 13 Coxsackie strains that produce a cytopathogenic effect in this cell line. Please express the titers as TCD₅₀ per ml of culture fluid. I need this information to determine whether or not it will be possible to use these culture fluids and this cell line for the gradocol membrane filtration tests.

With many thanks and kindest regards.

Sincerely yours,

Albert B. Sabin, M. D.
