May 28, 1947.

Dr. Albert Sabin,
Children's Hospital Research Foundation,
Elland and Bethesda Avenues,
Cincinnati 29, Ohio.

Dear Albert:

Your manuscript entitled: JAPANESE B ENCEPHALITIS IN AMERICAN SOLDIERS IN KOREA was received several days ago, and it is still on my desk. Thank you ever so much for sending me this copy. Unfortunately I have not had time to read it yet, but will return it as you request. However, I would like very much to beg of you permission to hold it until other members of the group going out with me have had an opportunity of seeing it. This could be done by sending it around to all of them, that is to Casals, to Dr. Rees and to Dr. Keiklejohn or by holding it here until they arrive, and we can then go over it together.

However, if this is the only copy you have, and you are in a hurry to have it returned, please notify me immediately, and I will make arrangements to have it copied - if that will be satisfactory.

I have another question to ask. During our last conversation - I believe it was - you requested that I have some larvae from Kern County collected and handled just as you were having materials collected in Japan. Although I believe I made some notes as to this technique, I cannot find them at this time, and the season is starting and we would like to comply with your request on this. Please, therefore, give me the instructions in writing.

Very sincerely yours,

W. McD. Hammon, M. D.
Professor of Epidemiology
