Dear Dr. Sabin,

Many thanks for your letter of 17 December, 1955. I am very glad to know that a license has been granted to send polio material to me. It would be very nice if you were as kind as to send the typing serum samples. I have got already type polio strains adapted to tissue culture from Sweden. Therefore I am supplied with authentic strains but I was not able to receive type sera produced in monkeys. I prepared type sera in rabbits which, however, were not checked with standard sera.

I wish to thank your kindness.

Wit best wishes for 956.

Sincerely yours,

Prof. G. Ivánovics.
