Penn Vermont July 23/38

Dear Albert:

Your welcome letter of the 20th containing the news about Cattell is at hand. The news is disappointing but the disappointment is counterbalanced by the chance for prompt publication. There can be no other idea than yours about the use of a local typist to put the second draft of the paper in order, since our part-time secretary is away. Mrs. Stein returns August 18th.

Please keep an account of expenses and you will be reimbursed when you return or, if you prefer, now.

It was a nice occasion—the tea at the Morgans. I am sure the parents feel now that their daughter will be occupied.
advantageously during the next year.

Your chance remark about Landsteiner may lead to a fortunate outcome for the old man but I should have told you that van der Scheer indicated to me that Landsteiner might continue at the Institute (in a restricted way, to be sure) after next year.

Of course you know of his illness.

I believe that the Cattell paper will be accepted after it is shortened, although it is too bad that such much of necessity be made. With reference to the J.A.M.A. article, you will of course add a few choice words in the Galaxy to accede to Dr. Henne's suggestion concerning dosage.

It has been raining here also (for the first 5 days) and we live in hope for the return of bright sunny days.

With cordial regards to Sylvia and your quest for health.

My regards to Dr. H. M. Morgan, shows you this letter again.
