Dr A.B. Sabin
The Children's Hospital Research Foundation
Elland Ave and Bethesda
Cincinnati, Ohio
U.S.A.

Dear Dr Sabin,

Herewith I am forwarding you our communication on Toxoplasmosis. We thank you for your kindness to sponsor it for publication in the Proceedings of the Society for Experimental Biology and Medicine, which seems to be the best suited journal for a quick publication. We know that many workers in Europe have thrown themselves upon the subject of Toxoplasmosis and Dr Winsser has just returned from Switzerland, where he left some mice infected with Toxoplasma, and demonstrated the rabbit skin test. We shall appreciate very much if you would read the galley proof inorder to avoid delay of publication. We should like to have 250 reprints, but covers are not necessary.

With kindest regards from me and Dr Winsser as well, and the best wishes to you and Mrs. Sabin for the newly begun year, I am,

Sincerely yours,

(prof. Dr J.D. Verlinde)

P.S. Is there anything known about immunological differences or identity between human and animal Toxoplasma-strains?)
