Dr. Albert B. Sabin
Professor of Research Pediatrics
University of Cincinnati
Cincinnati, Ohio

Dear Sir:

I am writing a term paper for school on the new vaccine you have developed. I have read that you use attenuated virus in your vaccine and I wondered what the process is that you follow to weaken the virulent virus. I would appreciate it very much if you would send me some information on this subject.

Thank you very much.

Sincerely yours,

Beverly Johnson
