June 4, 1958

Professor Albert B. Sabin
Children’s Hospital Research Foundation
Cincinnati, Ohio

Dear Professor Sabin:

I am inclosing information on PERSPECTIVES IN BIOLOGY AND MEDICINE, a new journal designed for the communication of ideas.

Members of our Advisory Board have suggested that you be invited to write an essay for PERSPECTIVES along the lines of your interests in clinical investigation. This can be of any length up to thirty journal pages (450 words per page). We would like to have the essay within six to eighteen months. If you are interested in writing but cannot set a deadline at this time, we would be happy for you to write at your convenience.

We hope that you will accept this invitation. Please advise us of your decision.

Sincerely yours,

Dwight J. Ingle
Dear Doctor:

Here is a journal for your private study.

One of the problems facing scientists is the lack of opportunity to read about key advances and new theories in related fields of research.

PERSPECTIVES IN BIOLOGY AND MEDICINE publishes humanistic essays representing scientific thought of broad, non-specialized appeal and of high literary quality.

This journal is designed to communicate heuristic ideas. Our objective is to publish papers that enlarge biological horizons and bring specific medical problems into perspective with investigative work on life-processes. The orientation of PERSPECTIVES will be toward man and his illnesses, but with appreciation of the fact that the roots of medical theory reach into all fields of biology. If any discipline can offer new insight into the nature of metabolism, heredity, reproduction, growth, adaptation, individuality, aging, etc., or into the processes of contraction, conduction, and secretion, these are the new horizons which will permit a multi-disciplined approach to the problems of biology and medicine.

Original essays will include new hypotheses and concepts representing informed thinking and interpretive essays which take stock of the results and implications of recent and current research and indicate strategy for the future. Because perspective can also be set by looking at the past, there will be an occasional historical essay. Now and then leaders in education and research will be invited to write about education in biology and medicine and about needs in research. It is intended that each issue will include an autobiographical sketch of a person who has made important contributions to biology and medicine. The "Letters to the Editor" section will be a forum for brief presentation of ideas and for debate.

Past issues of PERSPECTIVES IN BIOLOGY AND MEDICINE contained articles by these famous scientists:
Autumn 1957
Herman M. Kalckar
"Some Considerations Regarding Biochemical Genetics in Man"
C. Judson Herrick
"Medical Teaching by a Non-Medical Specialist"
M. S. Goldstein
"Non-Endocrine Aspects of Stress"
and E. R. Ramey
Russell Meyers
M. E. Krahl
"Speculations on the Action of Insulin, with a Note on Other Hypoglycemic Agents"
Roger J. Williams
"Freud's Legacy to Human Freedom"
Lawrence S. Kubie
"Ten Years of Creative Group Therapy"
George Day

Winter 1958
Sir Henry Dale
"Autobiographical Sketch"
Jane A. Russell
"The Use of Isotopic Tracers in Estimating Rates of Metabolic Reactions"
D. W. Woolley
"The Revolution in Pharmacology"
C. F. A. Pantin
"Edward Forbes and the Modern Athens"
C. H. Andrewes
"Viruses in Health and Disease"
William B. Bean
"A Critique of Criticism in Medicine and the Biological Sciences in 1958"

Spring 1958
Russell M. Wilder
"Recollections and Reflections on Education, Diabetes, Other Metabolic Diseases, and Nutrition in the Mayo Clinic and Associated Hospitals, 1919-50"
Howard A. Schneider
"What Has Happened to Nutrition?"
Jay Tepperman
"Etiologic Factors in Obesity and Leanness"
Irvine H. Page,
"A Guide to the Theory of Arterial Hypertension"
J. W. McCubbin,
and A. C. Corcoran
Ward C. Halstead
"Some Biopsychology of Thinking, Imagery, and Memory"

Summer 1958 will contain:
Herbert S. Anker
"On the Rate of Incidence of Malignant Tumors"
Charles D. Aring
"The Medical Uses of Literacy"
Rene Dubos
"Infection into Disease"
J. C. Eccles
"Problems of Plasticity and Organization at the Simplest Levels of the Mammalian Central Nervous System"
Benson Ginsburg
"Genetics as a Tool in the Study of Behavior"
George Hevesy
"A Scientific Career"
A. S. Parkes
"The Art of Scientific Discovery"
Thomas G. Ward
"Gnotobiotics: A New Discipline in Biological and Medical Research"

We hope that you will share the enthusiasm of the editors, members of the Advisory Board, and this Press and send us your order for a subscription to PERSPECTIVES IN BIOLOGY AND MEDICINE.

Subscription rates for the U.S.A. and possessions are:

$6.00 for one year (a saving of $2.00 over the single copy price)

$11.50 for two years (a saving of half a dollar over the price of two one-year subscriptions)

$16.50 for three years (a saving of $1.50 over the price of three one-year subscriptions)

To enter your subscription, just fill out the inclosed order card. If, after reading the first issues, you are not satisfied with the journal, just notify us and your subscription will be canceled and the unused portion of the subscription price promptly refunded. (A Federal law prevents us from refunding all your money.)

Subscription rates for Canada and the Pan-American Postal Union are:

...$6.50 for one year
...$12.50 for two years
...$18.00 for three years

For all other countries, the subscription rates are:

...$7.00 for one year
...$13.50 for two years
...$19.50 for three years
Subscribers from the British Commonwealth, except North America and Australasia, may send their subscriptions to our authorized agent: The Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1. Subscriptions from all other countries should be sent directly to: The University of Chicago Press, 5750 Ellis Avenue, Chicago 37, Illinois, U.S.A. (Please have your bank identify transmittals as payment for PERSPECTIVES IN BIOLOGY AND MEDICINE.)

PERSPECTIVES has published and will publish essays of key importance in biology and medicine. We invite you to place your subscription now to insure your having a complete volume. We will enter subscriptions to begin with the first number (Autumn 1957) so long as the supply lasts.

We are especially interested in placing PERSPECTIVES in institutional libraries. Please consider the desirability of having it available in the library of your hospital, clinic, university, college, or in your departmental library. You will also find PERSPECTIVES suitable as a gift to friends or to a doctor son.

Sincerely yours,

Paul B. Carnegie
