April 25, 1961

Dr. Albert B. Sabin
University of Cincinnati Medical School
Cincinnati, Ohio

Dear Dr. Sabin,

Our Editorial Office is besieged with inquiries on recent advances in poliomyelitis; hence the summer issues of the International Record of Medicine will be devoted to Medical Progress in Poliomyelitis.

You are at the helm in this field, harboring newer knowledge so vital for practitioners. Why not unravel your wisdom by clarifying current concepts applicable to everyday practice?

Our Editorial Board will consider it an honor to feature your authoritative paper of about 2500 words, written with a co-author, if necessary, to expedite its completion by July, 1961.

Looking forward to an affirmative word in this worthy cause, I remain

Very sincerely yours,
