Naples 28th Febr., 1967

I am under the impression - according a broad casted interview - that you are preparing together with your collaborators, a product capable to furnish new energy to muscles affected by polio.

This fact interests us very much for a member of our family (a twelve years old boy) struck by polio since 1958, has not yet recovered the use of his legs.

I should be very grateful if you could let us know, if the above mentioned news has any foundation for I should be reassured for the future of my kid.

With the hope of a positive answer, I have the honor to be yours devoted servant.
