12 April 1967

Vice Admiral Robert B. Brown, MC, USN
The Surgeon General
Department of the Navy
Washington, D.C. 20390

Dear Admiral Brown:

I am writing with the expectation that you may be able to join us at the Board Meeting which will be held at the Walter Reed Army Institute of Research on 15-17 May. Our last meeting, in December, 1966, consisted of a series of executive sessions which were devoted to a discussion of preventive medicine programs and needs, and the role of the AFEB as it stood on the threshold of a second quarter century of service to the military. From the December meeting came considerable guidance for the Board and its Commissions. We would like to pursue the theme of military preventive medicine projections into the future and the manner in which the Board and its Commissions should align themselves in accord with such projections. In preparing the enclosed summary agenda, I have set aside the morning of the first day for this purpose.

I hope that you and your representatives at the meeting will be able to join the Board in a Social Hour which is scheduled for the afternoon of the second day, 16 May.

If you or your staff members have any items for the agenda that may deserve particular consideration, I would be pleased to incorporate them into the final agenda for the Spring Meeting.

Sincerely,

Gustave J. Dammin, M.D.
