Sept. 13, 1956

Dr. Thomas M. Rivers
The National Foundation for Infantile Paralysis, Inc.,
120 Broadway
New York 5, New York

Dear Tom:

At the conclusion of the meeting of the Program Committee for the forthcoming International Polio Congress you asked me to send you the name and address of the man in Stockholm who first published on the demonstration of crystalline arrays of virus particles in cells infected with an A.P.C. virus, as demonstrated by electron microscopy. His name is Dr. Lars Kjellen, Virus Department of the Central Municipal Bacteriological Laboratory, Stockholm, Sweden.

I also promised to send you a title for my contribution to the Congress. After due consideration, I have selected the following: "PROPERTIES OF ATTENUATED POLIOVIRUSES AND SELECTION OF APPROPRIATE STRAINS FOR A LIVE, ORAL VACCINE."

With all good wishes and kindest regards.

Sincerely yours,

Albert B. Sabin, M. D.
