Dr. Albert B. Sabin  
Rockefeller Institute  
66th St. and York Ave.  
New York, N. Y.

Dear Doctor Sabin:

Please excuse the delay in acknowledging receipt of your letter of August 24th and the reprints, due to absence from the city.

Needless to state, I greatly regret that Miss Kast and I did not see your paper in the Proceedings for April, 1936, as we would certainly have held up the publication of our paper until after trying the method you describe.

Our work, along with a review of the literature, was finished in March, 1936, but I did not get around to writing it up until the late summer months when it was sent to the Journal of Infectious Diseases in the latter part of November. As a result of these circumstances, neither Miss Kast nor I saw your paper and, needless to state, this is a matter of deep regret to us as I always try to include important literature.

Have you used adult brain tissue? We are preparing to try the method described although there may be some delay in securing fetal brain of the age you mention.

Very sincerely yours,

John A. Kolmer

Dear Dr. [Name],

I am writing to express my gratitude for the opportunity to attend your lecture on [topic].

Your insights and perspectives on [topic] were truly enlightening. I found the presentation to be informative and engaging. The level of detail and the depth of understanding you demonstrated were impressive. Your ability to explain complex concepts in a clear and concise manner was particularly appreciated.

I am currently working on [project/task] and I have already begun to apply some of the concepts you discussed. I believe that your ideas and research will significantly contribute to my work. I look forward to furthering my understanding in this field with your guidance.

Thank you once again for your time and efforts. I hope to have the opportunity to learn from you in the future.

Sincerely,

[Your Name]
