January 23, 1952

Dr. Albert E. Sabin
The Children's Hospital
Research Foundation
Elland Avenue and Bethesda
Cincinnati, Ohio

Dear Dr. Sabin:

We are very pleased to know that you will be able to talk at the conference we are having on February 14th and 15th on Chemoprophylaxis and Chemotherapy of Virus Infections with Special Reference to Poliomyelitis.

You suggested that you would like to have an opportunity to present some of the work on the 8-aminoquinoline compounds. Rather than putting it as another item separately on the program, we have the entire afternoon of the second day for the presentation of additional subjects for discussion, and I think it would be very good if we could hear about this work at that time. I am sure we shall all be very interested to hear about it under any conditions.

The enclosed material is for your information, and I hope that if there are other questions, you will not hesitate to ask me. Only to repeat what we have said in an earlier letter, we would like to respect the time limitations, so that there will be ample opportunity for discussing ideas which you might want to discuss beyond the scope of the paper.

We shall look forward to seeing you.

Sincerely yours,

Thomas Francis, Jr., M.D.
Virus Laboratory
School of Public Health

Congratulations to Sylvia et al.
Conference on

Approach to Chemoprophylaxis and Chemotherapy of Virus Infections

with Special Reference to Poliomyelitis

Each scheduled speaker is requested to prepare a manuscript of his address, as it is to appear in the proceedings. It is recommended that the manuscript be a condensed version, in so far as this is possible without serious omissions. Where illustrations are used, of such a nature that they cannot be reproduced on the typewriter, the speaker should supply multiple photographic copies of each. He will be informed of the number required. The cost of preparing these copies will be defrayed by the National Foundation. The condensed version of the manuscript and the accompanying illustrations should be delivered to the chairman at the beginning of the conference.

The discussion, following each scheduled paper, will be recorded verbatim, and a digest prepared for inclusion in the proceedings. The National Foundation will assume responsibility for recording and preparing a digest of this discussion. Each speaker will have an opportunity to edit his remarks. The scheduled addresses will not be recorded.

Will you need anything other than the usual $3\frac{1}{2}'' \times 4''$ lantern slides?
CONFERENCE ON

APPROACH TO CHEMOPROPHYLAXIS AND CHEMOTHERAPY OF VIRUS INFECTIONS

WITH SPECIAL REFERENCE TO POLIOMYELITIS

Program

February 14, 1952: MORNING SESSION

I. Mechanism of Drug Action

1. Chemical Interference with Cellular Enzymes
   Van R. Potter (30 minutes)

2. Chemical Interference with Cellular Function
   W. Shive (30 minutes)

3. Chemical Interference with Organic Function, especially
   of the Central Nervous System
   M. H. Seevers (30 minutes)

February 14, 1952: AFTERNOON SESSION

II. Cellular Metabolism and Virus Growth

1. Virus Development
   E. A. Evans, Jr., (30 minutes)

2. The Influence of Virus Infection Upon Tissue Metabolism
   E. Racker (30 minutes)

3. Mechanisms of Anti-Viral Agents
   W. W. Ackermann (30 minutes)

DINNER

February 15, 1952: MORNING SESSION

III. Influence of Chemicals upon Poliomyelitis Virus

1. Influence of Chemicals on Excretion of Poliomyelitis Virus from the Gastrointestinal Tract
   R. Ward (15 minutes)

2. Influence of Hormones on Poliomyelitis in Animals
   A. E. Sabin (15 minutes)

3. Influence of Dietary Factors on Poliomyelitis in Animals
   A. F. Rasmussen (15 minutes)

4. Influence of Chemicals on Propagation of Poliomyelitis Virus in Tissue Culture
   G. C. Brown (15 minutes)

February 15, 1952: AFTERNOON SESSION

IV. Further Studies and Discussion
Approach to Chemoprophylaxis and Chemotherapy of Virus Infections

With Special Reference to Poliomyelitis

Date: February 14th and 15th, 1952
Conference will convene at 9:30 A.M., February 14th
adjourn at 5:00 P.M., February 15th

Place: School of Public Health, Ann Arbor, Michigan

Transportation: New York Central Railroad

Greyhound bus

Willow Run Airport, although officially the Detroit Airport, is only 15 miles from Ann Arbor. Buses leave the airport for Ann Arbor at 7:45 A.M., 3:45 P.M., and 11:55 P.M. Taxi service is available at the airport.

Lantern Slides: You are reminded that arrangements will be made and equipment provided for projecting lantern slides and movies. Any tables or charts presented in the discussion should also be available for incorporation in the proceedings.

Reservations: Reservations have been made at the Michigan Union; however, space is not available for everyone to have a single room.

In order to facilitate making reservations for you, we should appreciate your filling in the blanks at the bottom of the page and mailing that portion to us as soon as possible.

Address: Thomas Francis, Jr., M.D.
University of Michigan
School of Public Health
Ann Arbor, Michigan
