Dear Dr. Albert B. Sabin,

The reprints of the article in the A.J.P.H. have not yet arrived. As soon as they do I shall be glad to send you a copy.

The Public Health Service people have requested me to present our data at the meeting in Bethesda. I shall, therefore, have an opportunity to discuss some of the questions that have arisen, in detail.

So far as I know the only people that were willing to stick their necks out and draw conclusions on incidence were Bob Korns and his colleagues. You have probably heard many questions raised about the validity of their conclusions. In all fairness, Bob, himself, has stressed the tentative nature of his results.

Yours sincerely,

Morris Greenberg, M.D.
Director
Bureau of Preventable Diseases
