April 19, 1956

Albert B. Sabin, M.D.
The Children’s Hospital
Research Foundation
Cincinnati 29, Ohio

Dear Doctor Sabin:

Attached to my original letter of March 12, 1956, concerning the Conference on Tests for Diagnosis and Determination of Immune Status in Poliomyelitis, was a proposed agenda. Since then a number of helpful suggestions have been received and a revised version of the agenda has been prepared. A copy of the latter is enclosed.

In order to allow plenty of time for general discussion, it is suggested that each person, who has agreed to speak on one or more of the topics listed on the agenda, limit his talk in each case to ten or at the most fifteen minutes.

Sincerely yours,

Henry W. Kumm, M.D.
Director of Research
