Mr. Charles C. Bennett, Chief
Scientific and Health Information
The National Foundation
800 Second Avenue
New York 17, New York

Dear Mr. Bennett:

In accord with our telephone conversation yesterday, I am sending you herewith the original manuscript entitled: "Field Studies With Live Poliovirus Vaccine and Their Significance for a Program of Ultimate Eradication of the Disease" that I shall present at the 1960 Symposium on Polio Vaccines in Newark, N. J. on April 20th. You indicated that you would reproduce this manuscript and make sufficient copies to permit you to send me at least 20 for personal distribution and also enough for the needs of Dr. Rivers, and Dr. Boyd.

You promised that as soon as you have finished reproducing the manuscript you will send the original copy to Dr. Victor Parsonnet, Chairman of the Committee on Public Health of the Academy of Medicine of New Jersey, who will use it for publication in the Journal of the Academy.

With many thanks and kindest regards.

Sincerely yours,

Albert B. Sabin, M. D.
